Subject index*

A

Abdomen, surgery
Risk factors for infectious complications after abdominal surgery for malignant disease (Velasco et al). 1996;24:1-6
Abdominal neoplasms
Risk factors for infectious complications after abdominal surgery for malignant disease (Velasco et al). 1996;24 1-6
Abstracts
Abstracts. 1996;24:83-156
Agency for Toxic Substances and Disease Registry
CDC and ATSDR electronic information resources for health officers (Friede and O'Carroll). 1996;24:440-54
Algorithm
Tuberculosis control in health care workers: an algorithmic approach (Grimes et al). 1996;24:70-8
Tuberculosis control in health care workers: an algorithmic approach (Zurlo). 1996;24:79-82 (Guest editorial)
Antibiotics
Measuring antibiotic use in a long-term care facility (Mylotte). 1996;24:174-9
Triclosan: applications and safety (Bhargava and Leonard). 1996;24:209-18 (Special art.)
Anti-infective agents, local
Microbial contamination of antiseptics and disinfectants (Oie and Kamiya). 1996;24:389-95 (Brief rep.)
Association for Professionals in Infection Control and Epidemiology
APIC guideline for selection and use of disinfectants (Rutala and APIC Guidelines Committee). 1996;24:313-42
Double-u double-u double-u dot APIC dot org: a review of the APIC World Wide Web site (Harr). 1996;24:455-62
Atrium; *see* **Heart atrium**
Autoclave
Pseudoautoclave failure caused by differences in spore test steam sensitivities (Gurevich et al). 1996;24:402-4

B

Bacillus subtilis
Comparative sporicidal effect of liquid chemical germicides on three medical devices contaminated with spores of *Bacillus subtilis* (Sagripanti and Bonifacino). 1996;24:364-71
Bacteremia; *see* **Septicemia**
Bacteria
Susceptibility of transient and commensal skin flora to the essential oil of *Melaleuca alternifolia* (tea tree oil) (Hammer et al). 1996;24:186-9

* February, pp. 1-56; April, pp. 57-156; June, pp. 157-222; August, pp. 223-342; October, pp. 343-416; December, pp. 417-490.

Blood
Reported blood exposure rates and staff nurse satisfaction with a closed surgical drainage system (Zerbe et al). 1996;24:190-8
Should infection control practitioners do follow-up of staff exposures to patient blood and body fluids? (Hope et al). 1996;24:57-66
Body fluids
Should infection control practitioners do follow-up of staff exposures to patient blood and body fluids? (Hope et al). 1996;24:57-66
Brief reports
Brief reports. 1996;24:13-23, 389-401, 463-7
Bronchoscopy
Mycobacterium gordonae in fiberoptic bronchoscopes (Jackson et al). 1996;24:19-23 (Brief rep.)

C

Candida
Urokinase in the treatment of bacteremia and candidemia in patients with right atrial catheters (Jones et al). 1996;24:160-6
Catheters, indwelling
Guideline for prevention of intravascular device–related infections (Pearson and Hospital Infection Control Practices Advisory Committee). 1996;24:262-93 (Special comm.)
Urokinase in the treatment of bacteremia and candidemia in patients with right atrial catheters (Jones et al). 1996;24:160-6
Centers for Disease Control
CDC and ATSDR electronic information resources for health officers (Friede and O'Carroll). 1996;24:440-54
The CDC and HICPAC guideline for isolation precautions in hospital: commentaries on an evolutionary process (Soule). 1996;24:199-200 (Special comm.)
HICPAC guideline for isolation precautions in hospitals: community hospital perspective (Preston). 1996;24:207-8 (Special comm.)
The infection control information system of the Hospital Infections Program, Centers for Disease Control and Prevention (Manangan). 1996;24:463-7 (Brief rep.)
Invited commentary: guideline for isolation precautions in hospitals, 1996 (Jackson and Lynch). 1996;24:203-6 (Special comm.)
The 1996 CDC and HICPAC isolation guideline: a pediatric perspective (Stover). 1996;24:201-2 (Special comm.)
Child
Impact of an infection control program in a specialized preschool (Krilov et al). 1996;24:167-73
The 1996 CDC and HICPAC isolation guideline: a pediatric perspective (Stover). 1996;24:201-2 (Special comm.)
Clinical case study
Clinical case study. 1996;24:294-8
Colony count, microbial
Pseudoautoclave failure caused by differences in spore test steam sensitivities (Gurevich et al). 1996;24:402-4
Unreliability of chemical integrators compared to spore tests for sterilizer monitoring (Gurevich et al). 1996;24:405-6
Commentary
Commentary. 1996;24:468-70
Communication
A brave new world of information and communication for infection control professionals (Friedman). 1996;24:417-9 (Guest editorial)
Computers
CDC and ATSDR electronic information resources for health officers (Friede and O'Carroll). 1996;24:440-54
Developing a home page for the World Wide Web (Saba). 1996;24:468-70 (Commentary)

Use of the Internet for infection control and epidemiology (Sparks). 1996;24:435-9
Cross infection
Factors associated with a significant reduction in hospital-wide infection rates (Malone and Larson). 1996;24:180-5
National Nosocomial Infections Surveillance (NNIS) Report, data summary from October 1986–April 1996, issued May 1996 (National Nosocomial Infections Surveillance (NNIS) Report). 1996;24:380-8 (Special comm.)
Nosocomial mumps: report of an outbreak and its control (Fischer et al). 1996;24:13-8 (Brief rep.)
Risk factors for infectious complications after abdominal surgery for malignant disease (Velasco et al). 1996;24:1-6
Severity of illness scoring systems to adjust nosocomial infection rates: a review and commentary (Keita-Perse and Gaynes). 1996;24:429-34
Culture
Assessment of urine collection technique for microbial culture (Prandoni et al). 1996;24:219-21

D

Day care
Impact of an infection control program in a specialized preschool (Krilov et al). 1996;24:167-73
Dental schools; *see* **Schools, dental**
Departmental role and scope
Departmental role and scope in infection control: use of a template that meets Joint Commission requirements (Pearson et al). 1996;24:53-6
Disinfection
Advantages and limitations of automatic flexible endoscope reprocessors (Muscarella). 1996;24:304-9
APIC guideline for selection and use of disinfectants (Rutala and APIC Guidelines Committee). 1996;24:313-42
Comparative sporicidal effect of liquid chemical germicides on three medical devices contaminated with spores of *Bacillus subtilis* (Sagripanti and Bonifacino). 1996;24:364-71
Microbial contamination of antiseptics and disinfectants (Oie and Kamiya). 1996;24:389-95 (Brief rep.)
Mycobacterium gordonae in fiberoptic bronchoscopes (Jackson et al). 1996;24:19-23 (Brief rep.)
Pseudoautoclave failure caused by differences in spore test steam sensitivities (Gurevich et al). 1996;24:402-4
A review of the plasma sterilization systems (Zafar). 1996;24:312 (Letter)
Unreliability of chemical integrators compared to spore tests for sterilizer monitoring (Gurevich et al). 1996;24:405-6

E

Editorials
Guest editorials. 1996;24:79-82, 158-9, 223-5, 343-5, 417-9
Education
Impact of an infection control program in a specialized preschool (Krilov et al). 1996;24:167-73
Self-paced learning stations for tuberculosis respirator training: report of a pilot program (Lieb et al). 1996;24:299-303

Endoscopy
Advantages and limitations of automatic flexible endoscope reprocessors (Muscarella). 1996;24:304-9
Infections transmitted by endoscopy: an international problem (Favero and Pugliese). 1996;24:343-5 (Guest editorial)
Transmission of *Helicobacter pylori* infection via flexible fiberoptic endoscopy (Akamatsu et al). 1996;24:396-401 (Brief rep.)
Use of sterile compared with tap water in gastrointestinal endoscopic procedures (Wilcox et al). 1996;24:407-10
Enteral nutrition
Gastrostomy tube infections in a community hospital (Pien et al). 1996;24:353-8
Enterococcus
Experience with a hospital-wide outbreak of vancomycin-resistant enterococci (Quale et al). 1996;24:372-9
Equipment and supplies
Advantages and limitations of automatic flexible endoscope reprocessors (Muscarella). 1996;24:304-9
Elimination of an outbreak of gram-negative bacteremia in a hemodialysis unit (Humar et al). 1996;24:359-63
Exposure risks related to the management of three wound drainage systems (Zerbe et al). 1996;24:346-52
Infections transmitted by endoscopy: an international problem (Favero and Pugliese). 1996;24:343-5 (Guest editorial)
Mycobacterium gordonae in fiberoptic bronchoscopes (Jackson et al). 1996;24:19-23 (Brief rep.)
Transmission of *Helicobacter pylori* infection via flexible fiberoptic endoscopy (Akamatsu et al). 1996;24:396-401 (Brief rep.)
Unreliability of chemical integrators compared to spore tests for sterilizer monitoring (Gurevich et al). 1996;24:405-6
Equipment failure
Pseudoautoclave failure caused by differences in spore test steam sensitivities (Gurevich et al). 1996;24:402-4

G

Gastrointestinal endoscopy
Use of sterile compared with tap water in gastrointestinal endoscopic procedures (Wilcox et al). 1996;24:407-10
Gastrostomy
Gastrostomy tube infections in a community hospital (Pien et al). 1996;24:353-8
Germicides; *see* **Disinfection**
Gloves; *see* **Protective devices**
Glutaral
Glutaraldehyde permeation: choosing the proper glove (Jordan et al). 1996;24:67-9
Gowns; *see* **Surgical gowns**
Guest editorials
Guest editorials. 1996;24:79-82, 158-9, 223-5, 343-5, 417-9
Guidelines
APIC guideline for selection and use of disinfectants (Rutala and APIC Guidelines Committee). 1996;24:313-42
The CDC and HICPAC guideline for isolation precautions in hospital: commentaries on an evolutionary process (Soule). 1996;24:199-200 (Special comm.)
Guideline for isolation precautions in hospitals (Garner and Hospital Infection Control Practices Advisory Committee). 1996;24:24-52 (Special comm.)
Guideline for prevention of intravascular device–related infections (Pearson and Hospital Infection Control Practices Advisory Committee). 1996;24:262-93 (Special comm.)
HICPAC guideline for isolation precautions in hospitals: community hospital perspective (Preston). 1996;24:207-8 (Special comm.)
Invited commentary: guideline for isolation precautions in hospitals, 1996 (Jackson and Lynch). 1996;24:203-6 (Special comm.)
The 1996 CDC and HICPAC isolation guideline: a pediatric perspective (Stover). 1996;24:201-2 (Special comm.)

H

Hand foam
Factors associated with a significant reduction in hospital-wide infection rates (Malone and Larson). 1996;24:180-5
Health personnel
Tuberculosis control in health care workers: an algorithmic approach (Grimes et al). 1996;24:70-8
Tuberculosis control in health care workers: an algorithmic approach (Zurlo). 1996;24:79-82 (Guest editorial)
Heart atrium
Urokinase in the treatment of bacteremia and candidemia in patients with right atrial catheters (Jones et al). 1996;24:160-6
Helicobacter pylori
Transmission of *Helicobacter pylori* infection via flexible fiberoptic endoscopy (Akamatsu et al). 1996;24:396-401 (Brief rep.)
Hemodialysis
Elimination of an outbreak of gram-negative bacteremia in a hemodialysis unit (Humar et al). 1996;24:359-63
Homeless persons
Pulmonary tuberculosis in a homeless person (Jackson). 1996;24:294-8
Hospital Infection Control Practices Advisory Committee
The CDC and HICPAC guideline for isolation precautions in hospital: commentaries on an evolutionary process (Soule). 1996;24:199-200 (Special comm.)
HICPAC guideline for isolation precautions in hospitals: community hospital perspective (Preston). 1996;24:207-8 (Special comm.)
Invited commentary: guideline for isolation precautions in hospitals, 1996 (Jackson and Lynch). 1996;24:203-6 (Special comm.)
The 1996 CDC and HICPAC isolation guideline: a pediatric perspective (Stover). 1996;24:201-2 (Special comm.)
Hospital Infections Program
The infection control information system of the Hospital Infections Program, Centers for Disease Control and Prevention (Manangan). 1996;24:463-7 (Brief rep.)
Hospital staff
Should infection control practitioners do follow-up of staff exposures to patient blood and body fluids? (Hope et al). 1996;24:57-66
Hospital-acquired infections; *see* **Cross infection**
Hospitals
The CDC and HICPAC guideline for isolation precautions in hospital: commentaries on an evolutionary process (Soule). 1996;24:199-200 (Special comm.)
Experience with a hospital-wide outbreak of vancomycin-resistant enterococci (Quale et al). 1996;24:372-9
Factors associated with a significant reduction in hospital-wide infection rates (Malone and Larson). 1996;24:180-5
Gastrostomy tube infections in a community hospital (Pien et al). 1996;24:353-8

Hospitals—cont'd
Guideline for isolation precautions in hospitals (Garner and Hospital Infection Control Practices Advisory Committee). 1996;24:24-52 (Special comm.)
Guideline for prevention of intravascular device–related infections (Pearson and Hospital Infection Control Practices Advisory Committee). 1996;24:262-93 (Special comm.)
HICPAC guideline for isolation precautions in hospitals: community hospital perspective (Preston). 1996;24:207-8 (Special comm.)
Invited commentary: guideline for isolation precautions in hospitals, 1996 (Jackson and Lynch). 1996;24:203-6 (Special comm.)
Severity of illness scoring systems to adjust nosocomial infection rates: a review and commentary (Keita-Perse and Gaynes). 1996;24:429-34
Status of tuberculosis infection control programs at United States hospitals, 1989 to 1992 (Sinkowitz et al). 1996;24:226-34
Surgical wound infections diagnosed after discharge from hospital: epidemiologic differences with in-hospital infections (Medina-Cuadros et al). 1996;24:421-8
A survey of tuberculosis control programs in seventeen Minnesota hospitals: implications for policy development (Van Drunen et al). 1996;24:235-42
House staff; *see* **Internship and residency**
Hydrogen peroxide
A review of the plasma sterilization systems (Zafar). 1996;24:312 (Letter)

I

Infection control, history
Guideline for isolation precautions in hospitals (Garner and Hospital Infection Control Practices Advisory Committee). 1996;24:24-52 (Special comm.)
Infection control practitioners
Should infection control practitioners do follow-up of staff exposures to patient blood and body fluids? (Hope et al). 1996;24:57-66
Information management
A brave new world of information and communication for infection control professionals (Friedman). 1996;24:417-9 (Guest editorial)
CDC and ATSDR electronic information resources for health officers (Friede and O'Carroll). 1996;24:440-54
Developing a home page for the World Wide Web (Saba). 1996;24:468-70 (Commentary)
Double-u double-u double-u dot APIC dot org: a review of the APIC World Wide Web site (Harr). 1996;24:455-62
The infection control information system of the Hospital Infections Program, Centers for Disease Control and Prevention (Manangan). 1996;24:463-7 (Brief rep.)
Use of the Internet for infection control and epidemiology (Sparks). 1996;24:435-9
Internet
Use of the Internet for infection control and epidemiology (Sparks). 1996;24:435-9
Internship and residency
Positive tuberculin skin test reactions among house staff at a public hospital in the era of resurgent tuberculosis (Cocchiarella et al). 1996;24:7-12
Intravascular devices; *see* **Catheters, indwelling**
Isolation
The CDC and HICPAC guideline for isolation precautions in hospital: commentaries on an evolutionary process (Soule). 1996;24:199-200 (Special comm.)
Guideline for isolation precautions in hospitals (Garner and Hospital Infection Control Practices Advisory Committee). 1996;24:24-52 (Special comm.)
HICPAC guideline for isolation precautions in hospitals: community hospital perspective (Preston). 1996;24:207-8 (Special comm.)
Invited commentary: guideline for isolation precautions in hospitals, 1996 (Jackson and Lynch). 1996;24:203-6 (Special comm.)
The 1996 CDC and HICPAC isolation guideline: a pediatric perspective (Stover). 1996;24:201-2 (Special comm.)

J

Joint Commission on Accreditation of Healthcare Organizations
Departmental role and scope in infection control: use of a template that meets Joint Commission requirements (Pearson et al). 1996;24:53-6

L

Latex
Glutaraldehyde permeation: choosing the proper glove (Jordan et al). 1996;24:67-9
Letters
Protective barriers and gown design (Belkin). 1996;24:222
A review of the plasma sterilization systems (Zafar). 1996;24:312
Long term care
Measuring antibiotic use in a long-term care facility (Mylotte). 1996;24:174-9

M

Melaleuca alternifolia
Susceptibility of transient and commensal skin flora to the essential oil of *Melaleuca alternifolia* (tea tree oil) (Hammer et al). 1996;24:186-9
Message from the editor
Message from the editor. 1996;24:157
Mumps
Nosocomial mumps: report of an outbreak and its control (Fischer et al). 1996;24:13-8 (Brief rep.)
Mycobacterium gordonae
Mycobacterium gordonae in fiberoptic bronchoscopes (Jackson et al). 1996;24:19-23 (Brief rep.)
Mycobacterium tuberculosis
Challenges associated with assessment of risk for tuberculosis in a dental school setting (Murphy and Younai). 1996;24:254-61
Positive tuberculin skin test reactions among house staff at a public hospital in the era of resurgent tuberculosis (Cocchiarella et al). 1996;24:7-12
Pulmonary tuberculosis in a homeless person (Jackson). 1996;24:294-8
Self-paced learning stations for tuberculosis respirator training: report of a pilot program (Lieb et al). 1996;24:299-303
Status of tuberculosis infection control programs at United States hospitals, 1989 to 1992 (Sinkowitz et al). 1996;24:226-34
A survey of tuberculosis control programs in seventeen Minnesota hospitals: implications for policy development (Van Drunen et al). 1996;24:235-42
Tuberculosis: old nemesis, new problems (Goldrick). 1996;24:223-5 (Guest editorial)
Tuberculosis control in health care workers: an algorithmic approach (Grimes et al). 1996;24:70-8
Tuberculosis control in health care workers: an algorithmic approach (Zurlo). 1996;24:79-82 (Guest editorial)
Tuberculosis in physicians: compliance with surveillance and treatment (Ramphal-Naley et al). 1996;24:243-53

N

National Nosocomial Infections Surveillance Report
National Nosocomial Infections Surveillance (NNIS) Report, data summary from October 1986–April 1996, issued May 1996 (National Nosocomial Infections Surveillance (NNIS) Report). 1996:24:380-8 (Special comm.)
Nosocomial infection; *see* **Cross infection**
Nurses
Reported blood exposure rates and staff nurse satisfaction with a closed surgical drainage system (Zerbe et al). 1996;24:190-8

O

Occupational exposure
Exposure risks related to the management of three wound drainage systems (Zerbe et al). 1996;24:346-52
Reported blood exposure rates and staff nurse satisfaction with a closed surgical drainage system (Zerbe et al). 1996;24:190-8
Should infection control practitioners do follow-up of staff exposures to patient blood and body fluids? (Hope et al). 1996;24:57-66
Tuberculosis in physicians: compliance with surveillance and treatment (Ramphal-Naley et al). 1996;24:243-53
Occupational Health and Safety Administration Control Plan
Factors associated with a significant reduction in hospital-wide infection rates (Malone and Larson). 1996;24:180-5

P

Patient discharge
Surgical wound infections diagnosed after discharge from hospital: epidemiologic differences with in-hospital infections (Medina-Cuadros et al). 1996;24:421-8
Patient education
Impact of an infection control program in a specialized preschool (Krilov et al). 1996;24:167-73
Pediatrics; *see* **Child**
Permeability
Glutaraldehyde permeation: choosing the proper glove (Jordan et al). 1996;24:67-9
In vitro versus in-use considerations for testing the permeability of gloves (Korniewicz). 1996;24:158-9 (Guest editorial)
Physicians as patients
Tuberculosis in physicians: compliance with surveillance and treatment (Ramphal-Naley et al). 1996;24:243-53
Plasma
A review of the plasma sterilization systems (Zafar). 1996;24:312 (Letter)
Postoperative complications
Risk factors for infectious complications after abdominal surgery for malignant disease (Velasco et al). 1996;24:1-6
Surgical wound infections diagnosed after discharge from hospital: epidemiologic differences with in-hospital infections (Medina-Cuadros et al). 1996;24:421-8
Preschools; *see* **Schools**
Protective devices
Glutaraldehyde permeation: choosing the proper glove (Jordan et al). 1996;24:67-9
In vitro versus in-use considerations for testing the permeability of gloves (Korniewicz). 1996;24:158-9 (Guest editorial)
Protective barriers and gown design (Belkin). 1996;24:222 (Letter)
Self-paced learning stations for tuberculosis respirator training: report of a pilot program (Lieb et al). 1996;24:299-303
Pseudoautoclave; *see* **Autoclave**
Pulmonary tuberculosis; *see* **Tuberculosis**
